19980506+AND+(((((list+OR+database)+OR+"data+base")+OR+memory)+OR+storage))+AND+
(facsimile+OR+fax))+AND+((("multiple+destinations"+OR+"multiple+telephone+numbers")
+OR+"multiple+fax+destinations")+OR+"multiple+recipients"))"> FIG. 5 shows the content of the
transmission-result table following the foregoing operation.

The present invention has an advantage that, by accommodating multiport and *memory*-transmission
function, can reduce overall communication time by dispatching messages having the same destination
in one dial-up, thereby eliminates multiple dial process and initial control protocol to be found on a one-
to-one basis communication.

While the invention has been particularly shown and described with reference to a preferred
embodiment , it will be understood by those skilled in the art that modifications in detail may be made
without departing from the spirit and scope of the invention.
